

THE “H” JELLY ROLL QUILT

Copyright Nov 2015 By Liz Katsuro

This SUPER easy quilt using 2.5" jelly roll strips comes out looking complicated, impressive and fabulous! But the secret is – even a beginner can handle this one!

Special note: to efficiently make this quilt, for each fabric used you'll need 2 strips. Since you'll need 2 of each fabric strip for this quilt, [basic color rolls](#) are your best bet since they have **2 each of 10 different fabrics**. [Special blue/green/turquoise/purple rolls with 2 each of 10 different fabrics are available for a limited time only for this project!](#)

WHAT YOU'LL NEED:

Baby - 49 blocks, 7 x 7 layout, 42" x 42"
20 color strips, 7 white strips
1 or more [basic color rolls](#), 1 [white scroll print roll](#)

Throw - 144 blocks, 12 x 12 layout, 72"x72"
58 color strips, 20 white
3 or more [basic color rolls](#), 1 [white scroll print rolls](#)

Queen - 225 blocks, 15 x 15 layout, 90"x90"
90 color strips, 31 white
5 or more [basic color rolls](#), 2 [white scroll print rolls](#)

King - 324 blocks, 18 x 18 layout, 108"x108"
130 color strips, 44 white
7 or more [basic color rolls](#), 3 [white scroll print rolls](#)

DIRECTIONS

1. From each set of 2 strips of the same color/print, do the following:
 - a) Cut (6) 6.5" pieces from one strip
 - b) Cut (4) 6.5" pieces from the other strip.
 - c) Set aside remaining piece of strip for use in Step 3.

Repeat for all sets of 2 strips.

Baby, 10 sets
Throw, 29 sets
Queen, 45 sets
King, 65 sets

2. From white strips, cut (3) 13.5" pieces.

Baby, 7 strips
Throw, 20 strips
Queen, 31 strips
King, 44 strips

3. Attach a white 13.5" piece to each side of the remaining strip piece from step one. (Your leftover strip will be a little longer – you can trim down to 13.5" and add the excess to your scrap pile!)

**Make 3-strip segment of two white strips
and one color strip**

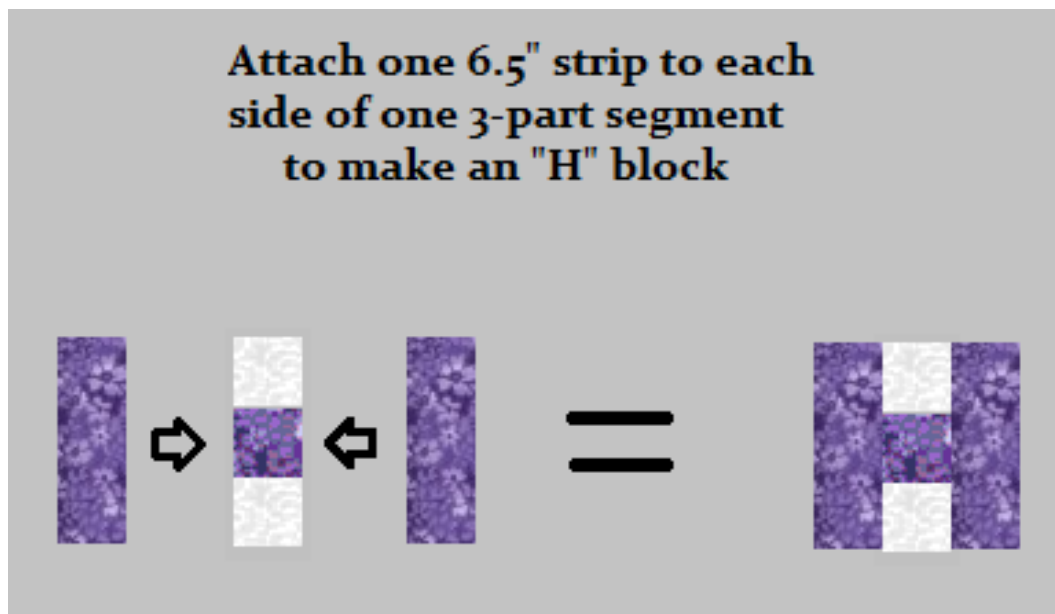

4. Cut 3-strip segment into (5) 2.5" pieces. The segment is an inch longer than you need, so if your edges don't match perfectly on either side, you can trim a little off before you start cutting.

Cut segment into (5) 2.5" pieces

5. Create your H blocks – you'll get 5 blocks of each fabric set.

6. Lay your blocks out alternating them by 90 degrees. Your odd numbered rows will start with an upright H, and even numbered rows with a sideways H.

Baby, 7 blocks across – make 4 starting with an upright H, and 3 starting with a sideways H

Throw, 12 blocks across – make 6 of each

Queen, 15 blocks across – make 8 starting with an upright H, and 7 starting with a sideways H

King, 18 blocks across – make 9 of each

7. Attach into rows, and attach rows together to complete your top.

Baby, 7 rows
Throw, 12 rows
Queen, 15 rows
King, 18 rows

BABY – 42” x 42”

THROW – 72” x 72”

QUEEN – 90”x90”

KING – 108" x 108"

Hope you've enjoyed this little easy tutorial!
Come check out our [basic colors section](#) for lots
of options for your “main” fabrics and
[white/black rolls](#) for the background!
